

Table of Contents

Unit	Title	Page
1.	The Origins of Design	3
	Basic Terminology in Architecture	6
2.	The Concept of Theory in Architecture	13
	The Relationship Between Theory and History in Architecture	17
3.	Design and Analysis in Architecture	22
	The Elements of Design	25
4.	Islamic Architecture	32
	Form and Function in Islamic Architecture	36
5.	Basic Structural Concepts	43
	Primary Loads	46
6.	Modern Urban Planning	55
	Achieving Good Urban Designs	58
7.	Space Planning	65
	The Design Program	69
8.	Heat Transfer in Buildings	78
	Materials, Properties, and Thermal Performance of Buildings	81
9.	Sound Absorption	88
	Sound Absorbers	92
10.	Geology and Soils in Site Planning	100
	Structural and Drainage Characteristics	104
11.	Equilibrium of Bodies and Systems Using Collinear Forces	112
	Free-body Diagram	116
12.	Geographic Information Systems	122
	GIS in Land Planning and Site Design	127

13. Landscape Architecture	133
Professional Development	136
14. Audio-visual Communications	143
Determining Communication Goals	147
15. Modular Coordination	153
Modular Drafting	156
